 LinkedIn: <https://www.linkedin.com/in/madhav-goyal-165b39372/>

PROFESSIONAL SUMMARY

Results-driven Artificial Intelligence and Data Science undergraduate with strong experience in designing and developing AI-powered applications, full-stack web platforms, and machine learning solutions. Skilled in building scalable software using Python, JavaScript, React, Next.js, Node.js, Express.js, MongoDB, TensorFlow, and Streamlit.

Experienced in integrating Large Language Models (LLMs), REST APIs, database design, and modern software architecture into production-ready applications. Passionate about solving real-world problems through AI while following clean coding practices, modular system design, and performance optimization.

EDUCATION

Bachelor of Technology (B.Tech)

Artificial Intelligence & Data Science

Dr. Akhilesh Das Gupta Institute of Professional Studies (ADGIPS), Delhi

Expected Graduation: 2027

TECHNICAL SKILLS

Languages

Python • JavaScript (ES6+) • Java • SQL • HTML5 • CSS3

Frontend

React.js • Next.js • Tailwind CSS • Streamlit

Backend

Node.js • Express.js • REST APIs

Artificial Intelligence & Machine Learning

TensorFlow • Keras • Scikit-learn • OpenCV • NumPy • Pandas • Matplotlib

Databases

MongoDB • MySQL

Tools

Git • GitHub • VS Code • Postman • PyCharm

FEATURED PROJECTS

AI Interview Simulator

Next.js • Node.js • Express.js • MongoDB • Gemini AI

Developed a complete AI-powered interview platform that generates personalized interview sessions based on uploaded resumes and provides intelligent feedback using Large Language Models.

Highlights

- **Resume analysis using AI**
 - **AI-generated technical interview questions**
 - **Voice interview support**
 - **Coding interview environment**
 - **Authentication and user dashboard**
 - **Performance evaluation and scoring**
 - **Responsive modern UI**
 - **Secure backend APIs**
-

MRI Brain Tumor Detection System

Python • TensorFlow • EfficientNet • OpenCV • Streamlit

Designed and implemented a medical image classification system capable of identifying multiple brain tumor categories from MRI scans using deep learning.

Highlights

- **Image preprocessing pipeline**
- **Transfer Learning using EfficientNet**

- TensorFlow-based prediction engine
 - Confidence score visualization
 - Streamlit deployment
 - Performance metrics and confusion matrix
 - Modular architecture
-

Sales Prediction Dashboard

Python • Machine Learning • Streamlit

Built an interactive analytics platform capable of forecasting future sales trends from historical business data.

Highlights

- Data cleaning and preprocessing
 - Predictive machine learning models
 - Interactive dashboard
 - Business performance visualization
 - Real-time prediction interface
-

Python Automation Suite

Designed multiple automation utilities to simplify repetitive workflows involving files, spreadsheets, and data processing.

CORE COMPETENCIES

- Artificial Intelligence
- Machine Learning
- Full Stack Development
- REST API Development
- Object-Oriented Programming
- Database Design
- Data Structures & Algorithms

- **Software Engineering**
 - **Problem Solving**
 - **Debugging & Optimization**
-

RELEVANT COURSEWORK

Data Structures & Algorithms

Database Management Systems

Operating Systems

Computer Networks

Software Engineering

Object-Oriented Programming

Artificial Intelligence

Machine Learning

ACHIEVEMENTS

- **Developed multiple end-to-end AI and Full Stack applications.**
 - **Experienced with Git-based collaborative development workflows.**
 - **Built scalable RESTful backend services using Express.js.**
 - **Applied modern software engineering practices including modular architecture and reusable components.**
 - **Integrated AI models into real-world applications using TensorFlow and LLM APIs.**
-

LANGUAGES

English (Professional Working Proficiency)

Hindi (Native)

GITHUB PROJECTS

- **AI Interview Simulator**

- **MRI Brain Tumor Detection**
- **Sales Prediction Dashboard**
- **Python Automation Projects**
